FOREWORD

Upon request, the California Development Association has in this publication co-ordinated the efforts of various communities of the state in the compilation of a manufacturers directory.

This is step number one in the program of the California Development Association to improve market conditions and extend the markets for California manufactured products.

This directory has been made possible through the co-operation of leading manufacturers, related industries, and chambers of commerce. It is published on a non-profit basis, purposing mutual benefits.

The buyer is particularly served through carefully compiled information, valuable in locating sources of supply and making beneficial contacts. The advertiser whose products are brought to the immediate attention of interested groups, is especially benefited through these contacts with the purchasing power of the West and the markets of the world.

Twelve months of painstaking work have been spent in the preparation of this directory. Errors which are inherent in work of this kind may be found.

The California Development Association acknowledges with sincere thanks the assistance of the manufacturers of California and the many chambers of commerce of the state in making possible the publication of this directory of California manufacturers.

This directory is published under the supervision of the Industrial Department of the California Development Association.

THE CALIFORNIA DEVELOPMENT ASSOCIATION

The California Development Association is the State Chamber of Commerce of California, formed by the amalgamation of several trade and regional organizations, and functions as a centralized clearing house for the solution of statewide problems. The directors of the Association are a representative group of agricultural, industrial and financial leaders from all sections of the state.

The broad, guiding policy of the Association is *State Unity*.

Industrial Department.

This department functions on a basis of statewide unity of industrial effort. Through the analysis and correlation of individual community problems, efforts are co-ordinated and important statewide problems of the leading group industries are formulated. This is followed by a definite plan of action in co-operation with chambers of commerce and interested groups and embraces (1) service to established industries, (2) statewide co-ordination of industrial activities, and (3) introduction of new industries.

Agricultural Department.

The Agricultural Department furnishes a centralized medium and active leadership for the correlation of various regional and statewide organizations and movements identified with agricultural production and development, including statewide problems of irrigation, colonization, development finances, production, marketing and agricultural credit.

Department of Research and Information.

This department functions as a centralized and correlating medium for research along all lines which throw light on development problems in the state, particularly regarding the natural resources and the situations, problems and opportunities for development in agricultural, mining, lumber, manufacturing and other industries.

Department of Publicity.

This department operates as a centralized publicity medium preparing and disseminating news of statewide interest and concern.

Magazine Department.

This department functions in the publication of "The California Journal of Development," a monthly magazine reflecting conditions in the development of industry and commerce throughout the state.

Exhibit Department.

The functions of this department are the formation and maintenance of exhibits which portray in the most effective and interesting visual form the resources, industries, products and scenic attractions of the state of California. The construction and placing of a mammoth relief and panoramic model of California (600 feet long, the largest miniature construction in the world's history), in the nave of the State Ferry Building in San Francisco, is the first big step in the working program of this department.

Figure What Road Vibration Costs!

Take the motor out of your automobile. Put in on a solid foundation. Let it run. You'll have no starter or generator trouble. You'll have no expensive repairs to make. You'll get years of service.

For it isn't the running, but the punishing vibration of the road that makes your upkeep high.

And it is this unceasing road vibration that Gruss Air Springs absorb.

Figure what road vibration costs you. Then figure how much cheaper it would be to install Gruss Air Springs.

National Paper Products Company

A California Corporation

With three mills on the Pacific Coast, the National Paper Products Company manufactures a line of paper products which are nationally known and used. Here is a partial listing of the better-known commodities:

Kaybee and National Super-Test Solid Fibre Shipping Cases are used by the majority of canners and packers on the Coast and many Eastern wholesalers. The KAYBEE CASE is made from a board which is waterproofed by a special process known as "K. B." and it has filled a long-felt want in the packing industry.

Cartons and Containers of every description, waterproof if desired.

Oyster and Ice Cream Pails, made in the San Francisco factory on the fastest pail-making machine in the West, of the best grade manila stock.

Public Service Towels are sold all over the country by the leading supply and paper dealers.

Crinklet Paper Towels—a home towel, particularly for kitchen use. Dispenses from a wire holder.

Other commodities manufactured in San Francisco include **Milk Bottle Caps and Fibre Cans**.

The Los Angeles Plant is devoted to the manufacture of **Liquid Soaps, Ammonia and Disinfectants**—and other chemicals, trade-marked as follows:

"SOP-O-ZON"
"ARROW LIQUID SOAP"

"BOBRICK'S CLOUDY AMMONIA"
"EAGLE BRAND LIQUID SOAP"

THIS ASSOCIATION consists of forty-nine lumber mills, located in the State of California and in the Klamath Falls, Oregon, district..

These mills produce California White Pine, California Sugar Pine, California White Fir, principally, also California Incense Cedar, Douglas Fir, and Red Fir.

The annual production of this district is approximately 1,500,000,000 board feet, of which the Association mills produce 1,300,000,000 feet. The proportion of production is about as follows:

California White Pine - - - -	57%
California Sugar Pine - - - -	18%
California White Fir - - - -	15%
Douglas Fir - - - - - - -	6%
California Incense Cedar - - -	2%
Other Woods - - - - - - -	2%

The Association is not a sales organization. The Trade Extension Department desires to assist architects, builders, manufacturers, dealers, and consumers in all matters relating to the use of these woods.

Architects, builders, manufacturers and others are requested to write us concerning their uses for wood, and we will promptly reply, telling the kinds, sizes and grades that we recommend for any special purpose.

Inquiries should be addressed to the Association, and will be promptly answered by a competent wood technologist, formerly with the Forest Products Laboratory, conducted by the U. S. Government at Madison, Wisconsin, and now associated with us.

THIS USED TO HAPPEN

Time was when the housewife bought a quarter's worth of rolled oats, ten cents' worth of crackers and a thirty-cent "pound pat" of butter.

She gave the grocer a dollar bill and got the day's gossip thrown in free—with her thirty-five cents change.

WHAT HAPPENS NOW

Today, the housewife drives up in front of a Piggly Wiggly or Sam Seelig Store, grabs a basket and picks off the shelves Kellogg's Corn Flakes—Uneda Biscuits—Golden State Butter—all *packed in cartons*.

And, if your carton doesn't look good to her—it gets left—that's all.

In the old days, grocers used to *sell* your product. Nowadays, housewives *buy* your carton. Get the difference?

"Cash and carry" adding machines have a cold-blooded way of judging cartons. And it might pay you to ask yourself about your carton—how does it look?—how does it compare?

Then, call on us. Maybe we can be of service.

"Musical and costume pageants and entertainments, portraying important phases of the different group industries, serve as attractive features in connection with expositions, annual conferences, and special demonstrations. Such features are also being used by manufacturers in many instances to more forcibly carry out their advertising campaigns. Your firm is particularly qualified to present such special feature attractions."

Furniture Made in the West

You Keep 15 Men at Work When You Buy \$150 Worth of Western-Made Furniture

Cutting Western Timber

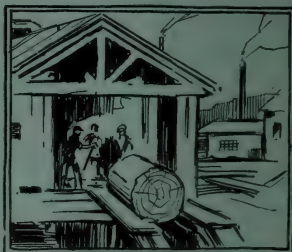

Every \$150 you spend for Western-made furniture gives one day's employment to 15 Pacific Coast workmen.

If your \$150 buys furniture *not* made in the West, those 15 men are kept idle for that day!

Unemployment affects everybody—the idle men and their families;

their grocers, butchers; merchants in every line with whom they are accustomed to spend their earnings.

All these retailers, finding their sales falling off, in turn reduce their orders to manufacturers, who find times dull and cut down overhead *by laying off more men!* Thus the vicious circle starts all over again.

Unloading and Loading Cars

OAKLAND PLANT

Our facilities for the handling of pipe, both in loading and unloading of carload lots, are not equaled by any pipe house in Northern California. Cars are frequently unloaded and loaded in one-half to one hour's time.

Large overhead traveling cranes allow us to give you the speed and service; that's why Pacific Used Pipe ranks foremost. Large stocks, both new and used, always on hand.

Air has been put to work in the service of mankind, in the same manner Watt conquered steam and Edison electricity.

Wherever men are collectively busy there is an air application that spells economy in human energy and operating costs. Have you ever thought of harnessing air to solve your problem?

Today you can call in Sturtevant Engineers on any air moving problem leading to conservation of manufacturing process, increased quantity and quality of output. From the smallest buffing wheel exhaust fan to the largest mine ventilating unit, Sturtevant equipment is designed to help industries with their air problems.

THE LAST WORD IN WOOD PRINTING PRESSES

'The 1924 Acme Automatic'

BUILT BY THE
NORTH MACHINE CO.

324 MAIN STREET, SAN FRANCISCO, CAL.

This machine can handle 50 to 100 shocks per minute, 3000 to 6000 per hour, and handle them right.

You can change Brands easily in two minutes. All gears are covered.

Absolutely no chance of any part of the machine breaking by a shock getting jammed or anything else unexpectedly happening. This is taken care of by the Safety Clutch (indicated by arrow) which throws out the feed control until fault is rectified.

We have the best Printer on the market, and our many "Repeat Orders" go far to substantiate our claim.

We also build a press to handle Paper Cartons equally as well as Wood Shocks.

THE NORTH MACHINE CO.

FAGEOL COMPOUND TRUCKS

91% More Power
36% More Road Speed

The Fageol Seven-Speed Transmission not only gives Fageol Trucks a wider operating range, but also enables them to operate more economically, and makes them far more durable by decreasing the strains due to heavy loads and extremely adverse operating conditions.

The 1924 models are completely equipped in compliance with the California State Motor Vehicle Act, and can carry their rated load, or more, up to the legal limit of speed.

SHASTA COUNTY

— a land of industrial Opportunity

AGRICULTURE in Shasta county offers an unlimited field for development. Anything which can be successfully grown in the state of California can be raised in Shasta county with equal success. There are 45,000 acres of TILLABLE SOIL UNDER IRRIGATION in Shasta county and available for agricultural enterprises.

POWER DEVELOPMENT and MINING hold forth splendid opportunities for new enterprises. There is an abundance of water for power development purposes, and Shasta county has long been famous for its natural resources in COAL, COPPER, and IRON.

DAIRY FARMING offers another profitable field of investment in Shasta county. As yet the industry is in its early and undeveloped stages, but within the past three years remarkable progress has been made in this, as in all other industrial enterprises in the county. *Dairy Farming is highly profitable in Shasta. It will pay you to make a thorough investigation of this opportunity.*

REDDING

THE COUNTY SEAT of Shasta county, is ideally situated for a manufacturing site. *Transportation Facilities* are to be found in abundance. *Power* in Redding may be secured at a minimum. There is a plentiful supply of skilled *Labor* in every line of endeavor.

REDDING is situated in the *Heart of Shasta County*. It is the shipping point for practically the entire county. And the *vast resources of Shasta County* are within the immediate range of Redding. Furthermore, the *people and city administration of Redding encourage industries to locate in their city.*

For more detailed information regarding any one or several of the various industrial opportunities which Shasta county and the city of Redding hold forth, address an inquiry to

The Best "Thirty"

Best Tractors are used for the varied needs of industry throughout the world.

They furnish the power for cultivating the farms and for harvesting; for building and maintaining roads and levees and for the construction of large dams. They are used in laying out city subdivisions and for numerous dirt-moving jobs. They furnish an economical power for the logging industry and for clearing the snow from the streets and highways of the snow districts of the East—and for a hundred similar uses at home and in various parts of the world.

Today the Best Tracklayer Tractor is the standard mobile power plant for the road-builder and contractor, the logger, the farmer and freighter.

Details of their construction and accomplishments may be secured on request.

A Reaction Turbine Runner Being Machined in the Pelton Shops

Impulse, Reaction Turbines

The illustration above is typical of the large scale work performed in the manufacture of hydraulic turbines. The turbine runner shown is the largest of its kind ever built in the West.

The Pelton Water Wheel Co. has not only established a world-wide reputation in the impulse turbine (water wheel) field but also occupies a prominent position among builders of reaction turbines. The world's records for large reaction turbine operation under high heads have been held by Pelton reaction turbines since 1920. Three reaction turbines of 33,000 H. P. each are now building in the Pelton shops, which will exceed in size any which have yet been installed in the West. The design and manufacture of governors, valves and other accessory apparatus are also important features of Pelton service to the power generating industry.

NOT A MEDICINE— *but a fresh corrective food*

Vigorous, lasting health—such health as makes everyone envy its fortunate possessor—

Thousands of men and women are enjoying it today who thought they had lost it forever. And they owe it, not to drugs or medicine, but to a simple fresh food which *keeps their bodies* free from the poisons of constipation.

Every cake of Fleischmann's Yeast consists of millions of tiny living plants, which help to increase the bulk of our concentrated modern diet, and gently stimulate the intestinal muscles to act for themselves.

It is only when your intestinal muscles are functioning normally that your body can be kept free from the deadly poisons which otherwise flood your system.

Eat two or three cakes regularly before or between meals—plain, dissolved in water or milk or spread on crackers or bread. A cake dissolved in a glass of hot water (cool enough to drink) before breakfast and at bedtime is especially beneficial in overcoming or preventing constipation. Fleischmann's Yeast comes only in the tin foil package—it cannot be purchased in tablet form. All grocers have it. Start eating it today.

For a Yeast for Health booklet, write to

Western-Made Furniture— Better Value

(Continued from page 36)

By purchasing Western-made home furnishings you not only keep money thus spent on the Pacific Coast where it makes new purchases, prevents idleness, and contributes to the general prosperity of the entire region, *but you get better value for your money.*

Western-made furniture is lower-priced because it carries neither high freight charges nor unpacking and refinishing costs. It is built to a uniformly high standard. It is designed for Western homes. (The wood is seasoned to this climate; the style is adapted to our architecture.) Moreover, furniture made on the Coast can be delivered on short notice, making it unnecessary for dealers to tie up their capital in large reserve stocks. So a saving is effected all around.

Keeping Our Money at Work at Home

(Continued from page 464)

Western Workers

All of the money spent for Western-made home furnishings is distributed among employers and employees of the Pacific Coast, adding to the prosperity of every line of business. Here is an illustration:

Suppose Mrs. "West-first" buys \$300 worth of Western-made furniture. This is what happens:

Two Pacific Coast workmen receive \$9 for cutting and hauling a tree to an Oregon saw mill, and the owner of the tree receives \$19 for its sale.

The saw mill pays \$6 in wages to 6 workmen for sawing, ripping, etc., and sells the lumber to a furniture manufacturer for \$39.

The manufacturer divides \$150 among 30 Pacific Coast workmen as follows:

- | | |
|----------------------------------------------|-----------------------------------------------------------------------------------------------------|
| 2 laborers to unload car | 1 mechanic to do belt sanding |
| 1 mechanic to grade and cut timber to length | 1 man for hand sanding |
| 1 mechanic to rip it to width | 2 mechanics for cabinet work |
| 1 man to joiner-plane it | 11 mechanics for the various processes in the finishing room—staining, shellacing, varnishing, etc. |
| 1 man to surface-plane it | 1 inspector |
| 1 man to glue it up | 1 packer, and in the case of upholstered furniture, |
| 1 mechanic to do hand sawing | 3 or more upholsterers |
| 1 mechanic to do sharper work | |
| 1 mechanic to do wood turning | |
| 1 man to do boring | |
| 1 mechanic to run machine sander | |

But all these men would have remained idle, if the furniture purchased had not been made in the West. The time has come for Western manufacturers of home furnishings to make these truths known to the people of the West. It is a common cause, and whether we make and sell, or purchase and enjoy the products of our Western factories, it vitally concerns us all.

MINERALS.

MAJOR IMPORTANT MINERAL RESOURCES BY COUNTIES

Alameda.....	Asbestos, brick, chromite, clay, coal, limestone, magnesite, manganese, pyrite, salt, soapstone, miscellaneous stone.
Alpine.....	Barium, copper, gold, gypsum, lead, limestone, pyrite, rose, quartz, silver, tourmaline and zinc.
Amador.....	Asbestos, brick, chromite, clay, coal, copper, gold, lime, quartz crystal, glass sand, sandstone, platinum, silver, soapstone and miscellaneous stone.
Butte.....	Asbestos, barytes, chromite, gems, gold, limestone, marble, mineral water, platinum group, silver and miscellaneous stone.
Calaveras.....	Asbestos, chromite, clay, copper, fuller's earth, gems, gold, limestone, marble, mineral paint, mineral water, platinum group, pyrite, quartz crystals, silver, soapstone and miscellaneous stone.
Colusa.....	Coal, chromite, copper, gypsum, manganese, mineral water, pyrite, quicksilver, sandstone, miscellaneous stone, sulphur and traces of gold and silver.
Contra Costa.....	Structural materials including brick and tile, cement, limestone, miscellaneous stone; also asbestos, clay, coal, gypsum, manganese, mineral water and soapstone.
Del Norte.....	Chromite, copper, gems, gold, iron, platinum group, silver and miscellaneous stone.
El Dorado.....	Asbestos, barytes, chromite, clay, copper, gems, gold, iron, molybdenum, limestone, quartz crystals, quicksilver, slate, soapstone, silver and miscellaneous stone.
Fresno.....	Asbestos, barytes, brick and tile, chromite, copper, gems, granite, gold, graphite, gypsum, magnesite, natural gas, petroleum, silver, quicksilver and miscellaneous stone.
Glenn.....	Sand and gravel deposits, chromite, copper, manganese, sandstone and soapstone.
Humboldt.....	Brick, chromite, coal, clay, copper, gold, iron, mineral water, natural gas, petroleum, platinum, silver and miscellaneous stone.
Imperial.....	Gold, gypsum, lead, marble, pumice, salt, soda, silver, and strontium, brick, borates, building stone, clay, fuller's earth, limestone.
Inyo.....	Antimony, asbestos, barytes, borax, copper, dolomite, gems, gold, gypsum, lead, marble, soda, silver, sulphur, talc, tungsten and zinc.
Kern.....	Antimony, asphalt, borax, brick, cement, clay, copper, fuller's earth, gems, gold, gypsum, iron, lead, limestone, magnesite, marble, mineral paint, natural gas, petroleum, potash, salt, silver, soapstone, soda, sulphur, tungsten, silica.
Kings.....	Fuller's earth, gypsum, mineral paint, natural gas, quicksilver.
Lake.....	Borax, chromite, clay, copper, gems, gold, gypsum, mineral water, quicksilver, silver, sulphur and miscellaneous stone.
Lassen.....	Brick, copper, gems, gypsum, gold, silver and sulphur.
Los Angeles.....	Asphalt, barytes, borax, brick, building tile, clay, fuller's earth, gems, gold, gypsum, infusorial earth, limestone, marble, mineral paint, mineral water, natural gas, petroleum, salt, glass sand, sandstone, serpentine, silver, soapstone, miscellaneous stone, potash from kelp, graphite, magnesium salts.
Madera.....	Copper, gold, granite, iron, lead, molybdenum, pumice, silver, building stone.
Marin.....	Brick, gems, manganese, mineral water, potash, soapstone and miscellaneous stone.
Mariposa.....	Barytes, copper, gems, gold, lead, marble, pyrites, silver, slate, soapstone and miscellaneous stone.

MINERALS—Continued

Mendocino.....	Asbestos, brick, chromite, coal, copper, graphite, magnesite, mineral water and traces of gold, platinum, silver and natural gas.
Merced.....	Antimony, building tile, magnesite, quicksilver, limestone, tile, miscellaneous stone and some gold and silver.
Modoc.....	Clay, coal, gold, iron, salt, silver and miscellaneous stone.
Mono.....	Barytes, clay, copper, gold, lead, limestone, molybdenum, onyx, pumice, sillimanite, salt, silver and travertine.
Monterey.....	Asbestos, brick, clay, copper, coal, dolomite, feldspar, fuller's earth, gold, silver, gypsum, infusorial earth, limestone, mineral water, petroleum, quicksilver, glass sand, sandstone, salt, silver and miscellaneous stone.
Napa.....	Chromite, copper, gypsum, magnesite, mineral water, quicksilver, sandstone and miscellaneous stone.
Nevada.....	Gold, silver, antimony, asbestos, barytes, bismuth, chromite, clay, copper, granite, gems, iron, lead, mineral paint, pyrite, soapstone, tungsten and miscellaneous stone.
Orange.....	Clay, coal, gypsum, iron, infusorial earth, sandstone, tourmaline, brick, natural gas, petroleum, some gold, lead and silver, and miscellaneous stone.
Placer.....	Gold, chromite, granite, copper, clay, asbestos, brick and tile, coal, gems, iron, lead, limestone, magnesite, manganese, mineral paint, mineral water, marble, quartz, crystals, glass sand, silver and miscellaneous stone.
Plumas.....	Chromite, copper, gold, granite, iron, lead, limestone, manganese, molybdenum, platinum, silver, zinc and miscellaneous stone.
Riverside.....	Brick and tile, cement, clay, coal, copper, feldspar, gems, granite, gold, flourite (optical), gypsum, iron, lead, limestone, manganese, magnesite, marble, mineral paint, mineral water, silica, salt, soapstone, silver, miscellaneous stone and tin.
Sacramento.....	Brick and tile, clay, gold, granite, natural gas, platinum, silver and miscellaneous stone.
San Benito.....	Antimony, asbestos, bituminous rock, chromite, coal, dolomite, gems, gypsum, limestone, magnesite, mineral water, miscellaneous stone, cement and quicksilver.
San Bernardino.....	Asbestos, barytes, borax, brick, calcium chloride, cement, clay, copper, fuller's earth, gems, gold, granite, gypsum, iron, lead, limestone, manganese, marble, mineral paint, mineral water, nitre, potash, salt, silver, soapstone, soda, miscellaneous stone, strontium, talc, tungsten, vanadium and zinc.
San Diego.....	Bismuth, lithia, marble, nickel, soapstone, tin, potash from kelp, clay, feldspar, fuller's earth, gems, gold, granite, magnesium salts, mineral water, silver, miscellaneous stone, marble, silica, salt.
San Francisco.....	Crushed rock, sand, gravel, very small quantities of cinnabar, gypsum, lignite, magnesite and pumice.
San Joaquin.....	Brick, clay, manganese, natural gas, glass-sand, miscellaneous stone and some gold, platinum and silver by dredging.
San Luis Obispo.....	Asphalt, bituminous rock, diatomaceous earth, brick, chromite, coal, copper, gypsum, infusorial earth, iron, limestone, marble, mineral water, onyx, petroleum, quicksilver, soda and miscellaneous stone.
San Mateo.....	Barytes, chromite, infusorial earth, quicksilver, salt, miscellaneous stone, magnesium salts, petroleum and potash.
Santa Barbara.....	Asphalt, brick, diatomaceous earth, gilsonite, gypsum, magnesite, quicksilver, mineral water, natural gas, petroleum, sandstone, shale oil, miscellaneous stone, bituminous rock, potash.
Santa Clara.....	Brick, chromite, clay, limestone, magnesite, manganese, mineral water, petroleum, quicksilver, soapstone and miscellaneous stone.

MINERALS—Concluded

Santa Cruz	Lime, limestone, bituminous rock, cement, potash and miscellaneous stone.
Shasta	Asbestos, barytes, brick, chromite, coal, copper, gold, iron, lead, lime, limestone, mineral water, molybdenum, pyrite, silver, soapstone, miscellaneous stone and zinc.
Sierra	Asbestos, chromite, copper, iron, lead, platinum, serpentine, talc, gold, silver and miscellaneous stone.
Siskiyou	Chromite, clay, coal, copper, gems, gold, lead, limestone, manganese, marble, mineral water, pumice, quicksilver, sandstone, silver and miscellaneous stone.
Solano	Brick, cement, clay, fuller's earth, limestone, mineral water, natural gas, onyx, quicksilver, salt and miscellaneous stone.
Sonoma	Brick, chromite, clay, copper, graphite, infusorial earth, magnesite, manganese, marble, mineral paint, mineral water, quicksilver and miscellaneous stone.
Stanislaus	Brick, clay, gypsum, mineral paint, quicksilver, silver, magnesite, gold, manganese ore, platinum and miscellaneous stone.
Sutter	Coal and clay deposits.
Tehama	Brick, chromite, copper, gold, manganese, marble, mineral water, salt and miscellaneous stone.
Trinity	Asbestos, barytes, chromite, copper, gold, mineral water, platinum, quicksilver, silver and building stone.
Tulare	Brick, clay, copper, feldspar, graphite, gems, limestone, magnesite, marble, quartz, glass-sand, soapstone, miscellaneous stone and zinc.
Tuolumne	Chromite, clay, copper, gold, lead, limestone, marble, mineral paint, platinum, soapstone, silver, miscellaneous stone, dolomite, granite and magnesite.
Ventura	Asphalt, borax, brick, clay, mineral water, natural gas, sandstone, miscellaneous stone and petroleum.
Yolo	Iron, sandstone and quicksilver.
Yuba	Iron, clay, gold, platinum, silver and miscellaneous stone.

Include in Your Budget Representation in

The California Journal of Development

STATEWIDE magazine issued in the interest of the entire State. The printed circulation represents but a fraction of the business-executive readers reached by this magazine each month—the gateway to those in control of the tremendous purchasing power of California industries.

A 100 per cent circulation vitally interested in California's progress and the building up of all industries. Get your message before them—whether you have a commodity to sell or service to offer.

We are thoroughly equipped to prepare and illustrate your advertisements and to attend to all details for you to get your business before the executives of California through this magazine. A letter will bring full details by return mail. If you are in San Francisco, telephone Garfield 4646 and our representative will call.
